-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The Claim is rejected under 35 U.S.C. 103(a) as being unpatentable over Japan (9-26052) in view of Japan (05-187572). As noted in the PCT IPER form 409 completed on 7/15/2004 and submitted to the PTO on 2/28/2005, JP/052 discloses a control device with a piston 18, a compressed air inlet 24, 27, a booster means with a pivotal member 22, and bellows 26 substantially as claimed but does not disclose the bellows to be made from metal. However, Japan/572 teaches another valve using a bellows seal having the bellows made from metal apparently for the purpose of having a sturdier bellows structure. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make the bellows of JP/052 from metal as, for example, taught by JP/572 in order to have a sturdier bellows structure.
